

# What Will I Learn at LEARN?

LEARN's tech stack

# What is a Tech Stack?

---

A tech stack is a combination of software products and programming languages used to create a web or mobile application.

# Some common tech stacks include ....

---

- LAMP stack - Linux, Apache, MySQL, PHP
- MEAN stack - Mongo, Express, Angular, Node
- MERN stack - Mongo, Express, React/Redux, Node
- Ruby on Rails - Monolithic App
- Rails, React, Postgres - we'll learn this one.....

# Learn's Tech Stack

## Front End

### View - client side

- HTML
- CSS
- JAVASCRIPT
- REACT - (frontend JS library)

## Back End

### model / controller - Server Side

- RUBY
- Rails (backend framework)
- SQL / Postgres
- API

# Aside from the tech stack you will also have...

---

- 1 week of Professional Development with Bryan
- 1 week of tech talks
- 2 weeks of group projects
- 1 week of misc. topics / internship study
- One on Ones in week 4 and week 8
